Shake well before use and gently massage into the skin (at least 2mg/cm²) half an hour before sun exposure and every 2 hours or more often in case of frequent swimming or intense perspiration.

SPECIFIC DERMATOLOGICAL PHOTOPROTECTION **365 DAYS**

LOCALIZED

ACNESTIL SEBUM-NORMALIZING CREAM SPF 50+

Light emulsion with sebum-regulating, mattifying and soothing action.

Skin type
Sensitive acne-prone skin

- Features**
- Azeloglycine
 - Niacinamide
 - Dipotassium Glycyrrhizinate
 - Vitamin E
 - Pro DNA Complex

AGE REPAIR ANTI-AGE PROTECTIVE CREAM SPF 50+

Creamy emulsion, reduces the visible signs of photoaging.

Skin type
Sensitive skin, prone to photoaging

- Features**
- Age-repair Complex
 - Hyaluronic acid
 - Pro DNA Complex

D-CLAR TINTED PHOTOPROTECTIVE UNIFORMING CREAM SPF 50+

Melting emulsion with depigmenting and uniforming action Available in 2 shades.

Skin type
Skin prone to hyperpigmentation

- Features**
- Claritech-Complex
 - Vitamin E
 - Pro DNA Complex

TRANSPARENT STICK SPF 50+ and 30

Stick specifically for topical application

Skin type
Sensitive skin

- Features**
- SPF 50+: Vitamin E and Pro DNA Complex
 - SPF 30: Vitamin E and Pro DNA Complex

Application:
Apply directly on the area to be treated.

Application:

Gently massage into the skin (at least 2mg/cm²) half an hour before sun exposure and every 2 hours or more often in case of frequent swimming or intense perspiration.

*In vitro tests

DERMATOLOGICAL PHOTOPROTECTION

BABY TRANSPARENT SPRAY SPF 50+

Ultra-light transparent spray also for use on wet skin.

Skin type
Sensitive baby skin

Features

- Vitamin E
- Alpha-Bisabolol
- Pro DNA Complex
- Fragrance-free

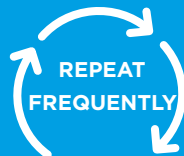

Application:

Spray at a distance of 5cm and gently massage into the skin (at least 2mg/cm²) half an hour before sun exposure.

HOW DO I PROTECT CHILDREN?

Apply the sunscreen at **least 30 minutes before** sun exposure.

Repeat application frequently and use a suitable amount, especially in case of prolonged exposure, intense perspiration or after swimming or drying.

Remember to bring: **T-shirt, hat and sunglasses!**

HOW DO I APPLY SUNSCREEN?

1st step

Apply the sunscreen before leaving home.

2nd step

Leave your child to enjoy playing in the sun.

3rd step

Repeat application frequently*.

4th step

Make them wear a hat, t-shirt and sunglasses during the hottest part of the day.

*Use a suitable amount especially in case of prolonged exposure, intense perspiration or after swimming or drying.

AFTER-SUN FACE & BODY

RESTRUCTURING & MOISTURISING AFTER SUN MILK

Fluid emulsion that regenerates the skin, keeping it healthy and toned.

Skin type
All skin types

Features

- Vitamin E
- Allantoin
- Panthenol
- Schisandra Chinensis
- Pro DNA Complex

REFRESHING AFTER SUN SPRAY

Fine spray emulsion that moisturises, refreshes and soothes the skin, keeping it healthy and toned.

Skin type
All skin types,
even the most sensitive

Features

- Schisandra Chinensis
- Tapioca starch
- Pro DNA Complex

TANNING INTENSIFIER

Fluid emulsion with a light texture that accelerates and intensifies tanning.

Skin type
All skin types

Features

- Vitamin E
- Acetyl Tyrosine
- Tyrosine
- Schisandra Chinensis
- Pro DNA Complex

Application:

After sun exposure, apply the product evenly on all affected parts, delicately massaging to encourage absorption. The intensifier can be applied during exposure after a cream with a protection level suited to the phototype.

BOOST OF HYDRATION

AQUA INTENSE

TO INTENSELY MOISTURIZE THE FACE AFTER SUN EXPOSURE

AQUA INTENSE SPRAY

Daily hydrating concentrate with a light and fresh texture that can be used on-the-go.

Skin type

Apply morning and night to cleansed and dried facial skin.

AQUA INTENSE 72H GEL CREAM

A slightly pinkish gel cream with an ultra-light texture that intensely moisturises and consolidates the skin barrier.

Skin type

All skin types

Features

- Hyaluronic acid
- Hydraboost
- Ceramides

Application:

Apply morning and night on the face and neck.

SUNBATHE RESPONSIBLY

RILASTIL TIPS FOR CORRECT SUN EXPOSURE

Always apply sun protection to prevent the risk of sunburn, reddening and sun rash.

Choose sunscreens suited to your phototype and based on the time and place of exposure.

Avoid staying out in the sun for too long and in the hottest part of the day.

Don't rely too much on the umbrella or clouds! UV rays can pass straight through.

Wear a t-shirt, hat and sunglasses to avoid getting burnt.

Help to protect those you care about, especially children and babies.

Apply the sunscreen at least 30 minutes before each exposure and use a suitable amount.

Repeat application frequently*.

Make sure you've covered all parts of your body, including thighs, neck, calves, feet and ears.

Don't forget to protect yourself even in the water!

*use a suitable amount especially in case of prolonged exposure, intense perspiration or after swimming or drying

SUNBATHE RESPONSIBLY

TIPS FROM MAREVIVO

Do not use disposable plastic.

Do not waste water under the shower.

Leave nothing but your footprints on the beach.

Do not take anything away.

Respect the animals, they are not a toy.

Use an ashtray for ash and stubs.

Use a bottle for water.

Use products that respect the environment.

Share these tips with your friends.
